PROFESSIONAL SUMMARY

I have had an interest in tech since first learning programming in secondary school.

Although I am currently working as a paramedic, I am now looking to transfer my skills to the tech industry.

I am a highly motivated self-starter, having taught myself front-end web development in my spare time. I bring excellent bilingual communication skills, attention to detail, and the ability to work both independently and as part of a team.

CORE QUALIFICATIONS

- HTML
- CSS
- JavaScript & ES6
- Responsive and accessible design
- Git
- Wireframing
- Debugging
- Fluent in English and German, basic knowledge of Swedish

EXPERIENCE

10/2021 - Current

Paramedic

South East Coast Ambulance Service | Tangmere, West Sussex

- Attended various accidents, emergencies and requests for medical assistance, taking confident control of distressing situations to minimise patient suffering.
- Communicated with patients, carers and relatives in challenging circumstances, giving reassurance and explaining difficult concepts.
- Executed reasoned and logical decision making both for and with the patient.
- Developed strong rapport with other medical professionals and local hospital staff, fostering quality and efficient patient care.
- Demonstrated dedication to providing quality care through continued training and education.

EDUCATION

2021

Glasgow Caledonian University | Glasgow

Bachelor of Science: Paramedic Science

- Graduated with Distinction
- Special strength in analytical and problem-solving subjects e.g. physiology, clinical life sciences, evidence-based practice
